Foreword

This volume contains a part of the papers presented at the 20th Winter School on Abstract Analysis. This Winter School consisted of two parts, which differed not only in the term, but also in the location. The section of topology and combinatorics was held in Harrachov, Giant Mountains, Czechoslovakia, January 25 to February 1, 1992. The section of analysis followed from February 2–9, 1992, in Strobel, Alps, Austria, and was sponsored by Johannes Kepler Universität, Linz. It was an idea of C. Stegall to organize a part of Winter School at a non-traditional place. We are greatly indebted to him for his effort with the excellent realisation of it.

The papers in the volume were submitted for publication before May, 11, 1992. To speed the publication of the proceedings, the full responsibility for the linguistic form of the papers was left to the authors.

I owe my thanks to the participants for creating an active working atmosphere and making the Winter School useful, exhausting and pleasant.

*It is my pleasure to acknowledge my indebtedness to the Department of Mathematics of the Faculty of Nuclear Engineering, Czech Technical University, for organizing the Winter School. I also wish to express my best thanks to the Center for Theoretical Study, an institute of advanced research affiliated with Charles University in Prague, for co-sponsorship and helpful assistance, and to the Editorial Board of *Acta Universitatis Carolinae, Mathematica et Physica*, for the publication of the proceedings.*

I am particularly to the chief persons of the organizing committee Dr. Eva Dontová and Dr. Jan Reittermann and to the managing editor of the journal Dr. Petr Simon.

Bohuslav Balcar
