## Contents

Preface .....	7
<i>Stanislav Bartoň, Tomáš Krumpholtz</i>	
Driver's influence on kinematics of articulated bus rear axle .....	9
<i>Daniela Bímová, Dana Černá, Václav Finěk</i>	
Wavelet bases for the biharmonic problem .....	15
<i>Marek Brandner, Jiří Egermaier, Hana Kopincová, Josef Rosenberg</i>	
Numerical modelling of flow in lower urinary tract using high-resolution methods .....	21
<i>Dana Černá, Václav Finěk, Martina Šimůnková</i>	
A quadratic spline-wavelet basis on the interval .....	29
<i>Marta Čertíková, Jakub Šístek, Pavel Burda</i>	
On selection of interface weights in domain decomposition methods .....	35
<i>Jan Chleboun</i>	
On the optimal setting of the <i>hp</i> -version of the finite element method .....	45
<i>Pavol Chocholatý</i>	
Integro-differential equations with time-varying delay .....	51
<i>Josef Dalík</i>	
Superapproximation of the partial derivatives in the space of linear triangular and bilinear quadrilateral finite elements .....	57
<i>Ján Eliaš, Jan Zítko</i>	
Approximate polynomial GCD .....	63
<i>Václav Finěk, Martina Šimůnková</i>	
Parallel implementation of wavelet-Galerkin method .....	69
<i>Cyril Fischer</i>	
Massive parallel implementation of ODE solvers .....	75
<i>Milan Hanuš</i>	
A new perspective on some approximations used in neutron transport modeling	81
<i>Martin Horák, Milan Jirásek</i>	
An extension of small-strain models to the large-strain range based on an additive decomposition of a logarithmic strain .....	88
<i>Jiří Hozman</i>	
Valuing barrier options using the adaptive discontinuous Galerkin method .....	94

<i>Radek Kaňa, Ctirad Matonoha, Štěpán Papáček, Jindřich Soukup</i> On estimation of diffusion coefficient based on spatio-temporal FRAP images: An inverse ill-posed problem .....	100
<i>Radka Keslerová, Karel Kozel</i> Numerical simulation of generalized Newtonian and Oldroyd-B fluids flow .....	112
<i>Jiřina Královcová, Ladislav Lukšan, Jaroslav Mlýnek</i> Heat exposure optimization applied to moulding process in the automotive industry .....	118
<i>Jiří Krček, Jaroslav Vlček, Arnošt Žídek</i> Tangential fields in optical diffraction problems .....	124
<i>Lukáš Krupička, Radek Štefan, Michal Beneš</i> Coupled heat transport and Darcian water flow in freezing soils .....	130
<i>Václav Kučera</i> Error estimates for nonlinear convective problems in the finite element method	136
<i>Jaroslav Mlýnek, Radek Srb</i> The optimization of heat radiation intensity .....	142
<i>Vratislava Mošová</i> Shape functions and wavelets – tools of numerical approximation .....	149
<i>Lukáš Pospíšil</i> An optimal algorithm with Barzilai-Borwein steplength and superrelaxation for QPQC problem .....	155
<i>Jan Příkryl</i> Graphics card as a cheap supercomputer .....	162
<i>Ivana Pultarová</i> Fourier analysis of iterative aggregation-disaggregation methods for nearly circulant stochastic matrices .....	168
<i>Petr Salač</i> Optimization of plunger cavity .....	174
<i>Karel Segeth</i> Smooth approximation of data with applications to interpolating and smoothing .....	181
<i>Jiří Vala</i> Numerical aspects of the identification of thermal characteristics using the hot-wire method .....	187

<i>Tomáš Vejchodský</i>	
Guaranteed and fully computable two-sided bounds of Friedrichs' constant . . . .	195
<i>Miloslav Vlasák, Václav Kučera</i>	
A priori diffusion-uniform error estimates for singularly perturbed problems: midpoint-DG discretization . . . . .	202
<i>Jan Vlček, Ladislav Lukšan</i>	
Modifications of the limited-memory BFGS method based on the idea of conjugate directions . . . . .	209
<i>Jan Zítko, Ján Eliáš</i>	
Calculation of the greatest common divisor of perturbed polynomials . . . . .	215
List of participants . . . . .	223
