CONCERNING THE PAPERS OF J. VANÍČEK.

The Editorial Board of the Commentationes Mathematicae Universitatis Carolinae consider it their duty to notify the following regrettable facts.

1) J. Vaníček's paper "On projections in Banach spaces, Comment.Math.Univ.Carol.5,3(1964),159-171 coincides with a part of the preprint of J. Lindenstrauss' paper On nonlinear projections in Banach spaces, which appeared under the same title, in the issue of the Michigan Math. Journal 11, pp. 263-287, October 1964. The preprint was sent by J. Lindenstrauss to J. Vaníček personally and was available neither to the Editors nor to the referees.

2) J. Vaníček's paper On the characterization of Banach spaces with the strong Kirtzbraun [sic!] - Valentine property, Comment.Math.Univ.Carol.5,4(1964),173-180, coincides with B. Grünbaum's paper On a theorem of Kirszbraun, Bull.Res.Council Israel Sect. F7(1957-8),129-132, both as to the factual content and to the method of proof.

3) J. Vaníček's paper A theorem of Hahn-Banach type for locally convex topological linear spaces, Comment.Math.Univ. Carol.5,3(1964),145-157 coincides with I. Sawashima's paper Locally convex spaces with the extension property, Nat.Sci. Rep.Ochanomizu Univ.,Vol.11,No 1(1960),19-27, both as to the factual content and to the method of proof except for Corollary 2 of Vaníček's paper.
