CONTENT

J. M. Arrieta and A. Rodríguez-Bernal: Blow up versus global boundedness of solutions of reaction diffusion equations with nonlinear boundary conditions . .	1
M. Berti: Nonlinear oscillations of completely resonant wave equations	9
Th. Blesgen: On ab-initio computations for phase change problems in solids . .	17
D. Blömker, M. Hairer and G. A. Pavliotis: Stochastic Swift-Hohenberg equation near a change of stability	27
P. Böhm: Diffpack Technical Summary	39
J. Dalík and J. Svoboda: Numerical modeling of the simultaneous heat and moisture transfer	49
F. A. Davidson and N. Dodds: Properties of eigenfunctions of non-local operators	57
J. Engländer and R. G. Pinsky: Uniqueness/nonuniqueness for nonnegative solutions of a class of second-order parabolic equations	67
R. Farwig, H. Kozono and H. Sohr: The Helmholtz Decomposition in Arbitrary Unbounded Domains – A Theory Beyond L^2	77
M. Feistauer and V. Kučera: Higher order method for the numerical solution of the compressible Euler equations	87
Córdoba, D. Córdoba and M. A. Fontelos: Finite time singularities in transport equations with nonlocal velocities and fluxes	97
T. Gallouët: Hyperbolic equations and systems with discontinuous coefficients or source terms	105
A. Gołaszewska and J. Turo: Carathéodory Solutions to Quasi-linear Hyperbolic Systems of Partial Differential Equations with State Dependent Delays	115
Nguyen Duc Huy and J. Stará: On existence and Schauder regularity of solutions to a class of generalized stationary Stokes problems	123
M. Chaves: On a blow-up estimate for a higher order semilinear parabolic equation	135
D. Cheban and C. Mammana: Invariant Manifolds and Almost Automorphic Solutions of Second-Order Monotone Equations	141
F. Jaroš: Strict φ -Disconjugacy of n -th Order Linear Differential Equations with Delays	149
J. M. Arrieta, A. Jimenéz-Casas and A. Rodríguez-Bernal: Robin type conditions arising from concentrated potentials	157
J. Daněček, O. John and J. Stará: Interior regularity for weak solutions of nonlinear second order elliptic systems	165
J. Kalas: Asymptotic properties of a two-dimensional differential system with delay	171

M. Krbec and H.-J. Schmeisser: A limiting case of the uncertainty principle ..	181
J. Kuben: Asymptotic Equivalence of Systems of Difference Equations.....	189
Tsang-Hai Kuo: Some existence result to elliptic equations with semilinear coefficients	197
P. Lima and L. Morgado: Numerical approximation of singular boundary value problems for a nonlinear differential equation.....	201
R. Liska and M. Kuchařík: Arbitrary Lagrangian Eulerian method for compressible plasma simulations.....	213
Yasunori Maekawa: On spatial decay estimates for derivatives of vorticities of the two dimensional Navier-Stokes flow.....	223
K. Makovíniyová and R. Zimka: On the existence of Hopf bifurcation in an open economy model.....	229
L. Maňásek: On Constructing a Solution of a Boundary Value Problem for Functional Differential Equations.....	237
N. Matzakos: Boundary Value Problems for Strongly Nonlinear Second Order Differential Inclusions	245
S. Meier and M. Böhm: On a micro-macro system arising in diffusion-reaction problems in porous media	259
V. Miljanović: Derivation of the Drift Diffusion Shockley-Read-Hall Model for Semiconductors	265
F. Minhós, T. Gyulov and A. I. Santos: Existence and location result for the bending of a single elastic beam.....	273
E. Minchev: Systems for phase transitions with hysteresis effect	283
I. Mojsej and J. Ohriska: On Third Order Advanced Nonlinear Differential Equations.....	293
P. Nečasal: The Beam Operator and the Fučík Spectrum	303
M. Macrì and M. Nolasco: Existence and asymptotics for selfdual periodic vortices of topological-type	311
T. Oberhuber: Computational study of the Willmore flow on graphs.....	321
S. Ogorodnikova: Multiple solutions of nonlinear Boundary value problems for equations with critical points.....	333
I. Ohnishi and M. Mimura: A Mathematical Aspect for Liesegang Phenomena	343
A. Pedro: Oscillation and nonoscillation criteria for retarded functional differential equations	353
A. de Pablo, M. Pérez-Llanos and R. Ferreira: Numerical blow-up for the p -Laplacian equation with a nonlinear source	363
M. A. Peter and M. Böhm: Scalings in homogenisation of reaction, diffusion and interfacial exchange in a two-phase medium.....	369
P. Rand: Asymptotic analysis of a nonlinear partial differential equation in a semicylinder	377
J. Rang and L. Angermann: New Rosenbrock Methods of order 3 for PDAEs of Index 2.....	385

V. Reitmann: Convergence in evolutionary variational inequalities with hysteresis nonlinearities	395
M. Arrieta, N. Moya, A. Rodríguez-Bernal: Dissipative dynamics of reaction diffusion equations in \mathbb{R}^N	405
J. Prüss, J. Saal and G. Simonett: Analytic solutions for the classical two-phase Stefan problem.....	415
J. García-Melián, J. D. Rossi and J. Sabina de Lis: Semilinear problems perturbed through the boundary condition	427
A. Gritsans and F. Zh. Sadyrbaev: On the Nehari solutions	435
O. Sawada: Remarks on the incompressible Navier-Stokes flows for linearly growing initial data	445
N. M. Stavrakakis and M. N. Poulou: Eigenvalue questions on some quasilinear elliptic problems	455
N. M. Stavrakakis: On some Klein-Gordon-Schrödinger Type Systems.....	459
M. Lehn, A. Stippler and K. Urban: FLENS — A Flexible Library for Efficient Numerical Solutions.....	465
Z. Svoboda: Positive solutions of p -type retarded functional linear differential equations	473
J. I. Tello: On a nonlinear nonlocal ODE and its applications.....	483
P. Tomiczek: Saddle Point Theorem and Fredholm alternative.....	489
K. Tomoeda: Support re-splitting phenomena caused by an interaction between diffusion and absorption.....	497
N. Breindl, G. Schneider and H. Uecker: Mathematical theory for the Ginzburg-Landau approximation in semilinear pattern forming systems with time-periodic forcing applied to electro-convection in nematic liquid crystals.....	505
J. Vala: On a numerical model of phase transformation in substitutional alloys	517
A. Rodríguez-Bernal and A. Vidal-López: Extremal equilibria for parabolic non-linear reaction-diffusion equations.....	529
A. Cañada, J. A. Montero and S. Villegas: Optimal Lyapunov inequalities and applications to nonlinear problems	539
J. Daněček and E. Viszus: A remark on Morrey type regularity for nonlinear elliptic systems of second order	549
Hwai-chiuan Wang: On a Ground State and two Symmetric Ground State Solutions in a Domain	557
M. Winkler: Connections between spatial decay of initial data and time asymptotics in a supercritical parabolic equation.....	565
I. Yermachenko: Multiple solutions of nonlinear Boundary Value Problems by the quasilinearization process.....	573
N. Yoshida: Oscillation criteria for half-linear partial differential equations via Picone's identity	587
