CONTENTS

Preface	5
List of participants	6
List of invited addresses	8
List of communications	10
Aarts, J.M. and Lowen-Colebunders, E.: On an example of Mary Ellen (Estill) Rudin	18
Alexiewicz, A.: Two-norm algebras	21
Atsuji, M.: On normality of the product of two spaces	25
Baayen, P.C.: Maximal linked systems in topology	28
Balogh, Z.: Relative compactness and recent common generalizations of metric and locally compact spaces	37
Błaszczyk, A.: On a factorization lemma and a construction of absolute without separation axioms	45
Bogatyĭ, S.A.: On preserving the fixed point property by mappings	51
Bognár, M.: On locally ordered spaces	59
Borsuk, K.: Problem	62
Boseck, H. and Czichowski, G.: Structure of connected locally compact groups	63
Byczkowski, T.: On the open mapping theorem	68
Charalambous, M.G.: A note on the dimension of products	70
Charatonik, J.J.: Problems and remarks on contractibility of curves	72
Chattopadhyay, K.C. and Thron, W.J.: Extensions of closure spaces and applications to proximity and contiguity structures	77
Chvalina, J.: Set transformations with centralizers formed by closed deformations of quasi-discrete topological spaces	83
Császár, K.: Separation and connectedness	90
Doitchinov, D.: The notion of \mathcal{K} -shape	95
Domiaty, R.Z.: Remarks to the problem of defining a topology by its homeomorphism group	99
van Douwen, E.K.: A technique for constructing examples	111
Durdil, J.: On the geometric characterization of differentiability	113
Fabian, M.: On singlevaluedness and continuity of monotone mappings	116
Flachsmeyer, J. and Terpe, F.: On convergence in the space of summations	119

Fleissner, W.G.: Box products of Baire spaces	125
Frič, R. and Koutník, V.: Sequentially complete spaces	127
Gähler, S.: On generalized vector topologies	132
Gähler, W.: On reflective and coreflective subcategories of LIM, LUN, and LVEC	136
Govaerts, W.: Categories of continuous function spaces	142
Grimeisen, G.: The limit inferior of a filtered set-family as a set of limit points	149
Hajek, D.W.: Wallman extendible functions with normal domains	154
Heinrich, S.: Linear-topological properties of operator spaces	156
Hejzman, J.: Covering dimensions and partitions of unity	159
Henriksen, M.: Tychonoff spaces that have a compactification with countable remainder	164
Hoshina, T.: Compactifications by adding a countable number of points	168
Hušek, M.: Categorical aspects are useful in topology	170
Ivanov, A.A.: Fixed point theorems for metric space mappings	173
Ivanšić, I.: Embedding compacta up to shape	178
Iwanik, A.: Two-sided nonsingular transformations	179
Jayne, J.E.: Generation of Baire sets	187
Jeschek, F., Poppe, H. and Stärk, A.: A compactness criterion for the space of almost periodic functions	195
Kannan, V.: Ordinal invariants in topology - summary	197
Kartsaklis, A.: Topological considerations in the foundations of quantum and time theories	207
Katětov, M.: Descriptive complexity of functions	214
Katuta, Y.: Monotone increasing covers and paracompactness	220
Kaul, S.K.: Regularity: a generalization of equicontinuity	223
Kent, D.C. and Richardson, G.D.: Some product theorems	228
Kneis, G.: Equicontinuity and the theorem of Arzela-Ascoli in uniform convergence spaces	231
Kratochvíl, P.: Multisequences and measures	237
Kuratowski, K.: Summary of the paper \mathcal{G} -algebra generated by analytic sets and applications	245
Kurepa, D.: Monotone mappings and cellularity of ordered sets	247
Lowen, R.: Convergence in fuzzy topological spaces	254
Mackowiak, T.: Planable and smooth dendroids	260
Marek, I.: Fredholm points of compactly perturbed bounded linear operators	268
Marjanović, M.M.: Some questions related to hyperspaces	276
van Mill, J.: Recent results on superextensions	279
Minc, P.: Local connectedness and fixed points	284

Mioduszewski, J.: Compact Hausdorff spaces with two open sets	288
Močkoř, J.: Topological groups of divisibility	291
Morita, K.: Some problems on normality of products of spaces	296
Müller, B.: T_3 -completions of convergence vector spaces	298
Musiak, K.: The weak Radon-Nikodym property in Banach spaces	308
Musielak, J.: An application of modular spaces to integral equations	311
Musielak, J. and Waszak, A.: Some problems of convergence in countably modular spaces	319
Mysior, A.: The category of all zero-dimensional realcompact spaces is not simple	327
Nel, L.D.: Subcategories with cartesian closed coreflective hull	329
Nelson, E.: Algebras of continuous functions in universal algebra	331
Nešetřil, J. and Rödl, V.: Ramsey topological spaces	333
Neubrunn, T.: Separate continuity and continuity for some generalized continuity notions	338
Novák, J.: Concerning the topological product of two Fréchet spaces	342
Nyikos, P.: Countable small rank and cardinal invariants	344
Patkowska, H.: A class α and compacta which are quasi-homeomorphic with surfaces	348
Pelant, J. and Reiterman, J.: Atoms in uniformities and proximities	353
Pol, E. and Pol, R.: A hereditarily normal strongly zero-dimensional space containing subspaces of arbitrary large dimension	357
Porst, H.E.: Embeddable spaces and duality in topological categories	361
Preuss, G.: Relative connectednesses and disconnectednesses in topological categories	367
Reichel, H.C.: Some results on distance functions	371
Rice, M.D.: Descriptive sets in uniform spaces	381
Riečan, B.: Extension of measures and integrals by the help of a pseudometric	390
Ringrose, J.R.: Derivations of quotients of von Neumann algebras	393
Rosický, J.: Liftings of functors in topological situations	394
Schmets, J.: On spaces of vector-valued continuous functions	400
Schrijver, A.: Characterizations of supercompact spaces	407
Schröder, J.: Wallman's method	412
Segal, J.: Local behavior in shape theory	413
Sekanina, M.: Topologies on systems of subsets	420

Seyedin, M.: On quasi-uniform convergence	425
Simon, P.: Uniform atoms on ω	430
Singal, M.K. and Arya, S.P.: On a theorem of Michael-Morita-Hanai	434
Šostak, A.: On a class of topological spaces containing all bicomact and all connected spaces	445
Szökefalvi-Nagy, B.: On some properties of the function class H^∞ and applications to Hilbert space operators	452
Tall, F.D.: Some topological applications of a generalized Martin's axiom	453
Tashjian, G.: Cartesian-closed coreflective subcategories of UNIF	454
Telgársky, R.: On some topological games	461
Vaughan, J.E.: Products of $[a, b]$ -chain compact spaces	473
van de Vel, M.: The fixed point property of superextensions	477
Vilímovský, J.: Uniformly continuous Banach valued mappings	481
de Vries, J.: Equivariant embeddings of G-spaces	485
Wage, M.L.: On a problem of Katětov	494
Wattel, E.: Subbase structures in nearness space	500
Wichterle, K.: Joint-convergence in function spaces. Order of \mathcal{K} -closures	506
Wicke, H.H. and Worrell, J.M., Jr.: Scattered spaces of point-countable type	513
Wilhelm, M.: On closed graph theorems	517
van Wouwe, J.M.: On generalized ordered p- and M-spaces	521
Zarelua, A.: On zero-dimensional mappings and commutative algebra	526
Zaremba, D.: On cohesive mappings	527
Zemánek, J.: A survey of recent results on the spectral radius in Banach algebras	531
