FOREWORD

This volume contains the abstracts of talks presented on the 6th Winter School, submitted for publication before June 15, 1978. Note that a general request to the speakers is to leave the abstracts of their talks (preferably type-written) in the conference room no later than the day before the talks are presented (except for the 1st day). The titles of most of the formal talks presented on the 6th Winter School are listed below. It should be remarked that the series of about 10 lectures following the Wasserman's book "Stability of unfoldings" (Lecture Notes in Math. 393, Springer 1974) is not listed below (J. Bureš, O. Kowalski, J. Šiška).

I owe thanks to the participants for making the winter school useful, exhausting and pleasant. It is a pleasure to acknowledge my indebtedness to the Faculty of Mathematics and Physics of the Charles University for sponsoring the 6th Winter Schools, and to the Mathematical Institute of the Czechoslovak Academy of Sciences for publishing this volume.

Z. F r o l i k

Praha, June 1978
