Foreword

This volume contains most of the papers presented at the 17th Winter School on Abstract Analysis held January 14–28, 1989, in hotel „Šumava“ in Srní (Bohemian Forest), submitted for publication before March 1, 1989. To speed the publication of the proceedings, the full responsibility for the linguistic form of the papers was left to the authors.

The first week was devoted to topology and combinatorics, the second one to analysis. I owe my thanks to the participants for creating an active working atmosphere and making the Winter School useful, exhausting and pleasant.

*It is my pleasure to acknowledge my indebtedness to the Department of Applied Mathematics of the Faculty of Mathematics and Physics of the Charles University, for organizing the Winter School. I also wish to express my best thanks to the Faculty of Mathematics and Physics, to the Mathematical Institute of the Czechoslovak Academy of Sciences, and to the Union of Czechoslovak Mathematicians and Physicists, for their traditional helpful assistance, and to the Editorial Board of *Acta Universitatis Carolinae* for the publication of the proceedings.*

I am particularly obliged to the secretary of the organizing committee Ms. Anna Kotěšovcová and the managing editor of the journal, RNDr Petr Simon.

Z. Frolík
