LIST OF COMMUNICATIONS

Ordinary differential equations

- Angelov, V. Sušestvovanije i edinstvennost rešenija načalnoj zadači dla odnogo klasa diferencial'nyh uravnenij nejtralnogo tipa
- Aulbach, B. The method of Zubov in the case of an asymptotically stable limit cycle
- Bobrowski, D. On oscillation criteria
- Brjuno, A.D. Normal'naja forma i bifurkacii v dinamičeskich sistémach
- Brown, R.C. Boundary value problems with general side conditions and their applications
- Brunovský, P. On the existence of regular synthesis of the optimal control
- Čanturija, T. O někotorych tēoremach sravněnija dla obyknovennyh diferencial'nyh uravnenij
- Cerha, J. Dirac function in Volterra equations
- Chow, S. Generalized Hopf bifurcation
- Daneš, J. On positive solutions of nonlinear operator equations
- Dijksma, A. On ordinary differential subspaces
- Djaja, Č. Někotoryje svojstva kvasi-počti periodičeskich dviženij dinamičeskich sistém
- Doležal, J. On a certain type of discrete two-point boundary value problem arising in discrete optimal control
- Elbert, Á. A comparison theorem for first order nonlinear differential equations with delay
- Erbe, L. Some applications of change-of-variable techniques for linear differential equations
- Farkas, M. Estimates on the existence regions of perturbed periodic solutions
- Gil'derman, J. Kusočno-afinnyje dinamičeskije sistémy
- Golokvosčjus, P. O strukture integralnoj matricy odnoj dvumernoj sistémy diferencial'nyh uravnenij v okrestnosti regularnoj osoboju točki sistémy
- Habets, P. On relaxation oscillations
- Heil, E. On an oscillation criterion of Hartman-Wintner-Potter
- Hetzer, G. Some remarks on periodic solutions of second order systems of ordinary differential equations
- Hristova, S. Asimptotičeskoje razloženije rešenija odnoj načalnoj zadači o singularno vozmuščennoj sistěme integro-differential'nyh uravnenij s zapazdyvanijem

- Jędryka, T.M. An estimation of the solution of Volterra integral equation for vector-valued function with values in an Orlicz space (a generalization of a problem of T.Ważewski)
- Kappel, F. Approximation results and functional-differential equations
- Karim, R.I. On the resonance case in systems of nonlinear differential equations with periodic coefficients
- Karták, K. Linear differential equations with discontinuous coefficients
- Kisielewicz, M. Extension of the Antosiewicz and Cellina continuous selection theorem
- Komorník, J. Solution of functional equations of the Riccati type on the infinite interval
- Krbec, P. Discontinuous Liapunov functions
- Kvedaras, B. On the solutions of degenerate differential equations in Banach spaces
- Kwapisz, M. On the existence and uniqueness of integrable solutions of functional equations in a Banach space
- Laloux, B. Bifurcation problems
- Mallet-Paret, J. Global Hopf bifurcation
- Marušiak, P. Oscillatory and asymptotic properties of delay differential equations
- Medveď, M. On generic bifurcations of second order ordinary differential equations near closed orbits
- Mikulík, Z. Über Transformationen der Differentialgleichungen dritter Ordnung
- Miluševa, S. Obosnovanije častično-multiplikativnogo usrednjenja dla rešenija krajevych zadač dla diferencial'nych uravnenij s otklonjajuščimsja argumentom
- Miričá, S. A suboptimal feedback control for linear slow-varying systems
- Muldowney, J.S. Linear differential inequalities
- Müller-Pfeiffer, E. Stetige Spektren bei Sturm-Liouvilleschen Operatoren
- Myjak, J. Most monotone operators over an invariant set have asymptotic equilibrium
- Nikolova, T.S. Ob odnoj krajevoj zadače dla beskonečnych sistem diferencial'nych uravnenij s otklonjajuščimsja argumentom
- Norkin, S.B. Struktura rešenij sistěmy diferencial'nych uravnenij s zapazdyvajuščimsja argumentom
- Peitgen, H.-O. Leray endomorphisms and cone mappings
- Pelczar, A. Stability and limit sets in generalized dynamical systems

- Pfaff, R. Lineare Differentialgleichungen zweiter Ordnung mit Distributionskoeffizienten
- Pivovarov, I. A contribution to the structure of autonomous nonlinear differential equations
- Răsvan, V. Some results concerning the dynamics of steam turbines control systems
- Rejnfel'd, G. Teorema svedenija
- Risito, C. Aperiodicity criteria
- Ronveaux, A. Stability interval for periodic 2nd order differential equation and poles of the Riccati equation
- Rzeżuchowski, T. An existence theorem for non-convex orientor fields in a Banach space
- Schneider, K.R. On Hopf bifurcation
- Sell, G.R. Omega limit sets for flows generated by functional-differential equations
- Stanković, B. Linear differential equation with coefficients in a ring
- Vanderbauwhede, A. Symmetric perturbations of nonlinear equations: symmetry of small solutions
- Voráček, J. On a nonlinear differential equation of the third order
- Vosmanský, J. Certain higher monotonicity properties of linear differential equations
- Werbowski, J. On the asymptotic behaviour of the solutions of nonhomogeneous differential equation with delay
- Zălinescu, C. On an abstract control problem

Partial differential equations

- Anger, G. Uniquely determined mass distributions in inverse problems
- Barták, J. Remark on Lyapunov stability of differential equations in Hilbert spaces
- Bernardi, M.L. On some singular evolution equations
- Biroli, M. Homogenization for variational inequalities
- Borzymowski, A. The uniqueness of solutions of tangential-derivative problems for some systems of nonlinear parabolic equations
- Chabrowski, J. Local Fatou property for the solution of parabolic equations
- Doktor, A. Global solution of mixed problem for nonlinear system of conservation laws
- Doktor, P. Remark about perturbations of variational inequalities

- Dragieva, N.A. Une solution de l'équation parabolique dans un domaine non cylindrique
- Gajewski, H.:
Gajewski, H. and Zacharias, K. On Vlasov's equation (Presented by K.Zacharias)
- Göhde, D. Eine Klasse singular gestörter elliptischer Differentialgleichungen
- Goncerzewicz, J. On the weak solution of boundary value problem arising-in theory of water percolation
- Grabmüller, H. Singular perturbations in linear integro-differential equations
- Hernandez, J. Positive solutions for a class of nonlinear eigenvalue problems
- Herrmann, L. Periodic solutions to abstract differential equations
- Holanová-Radochová, V. Remark to the solution properties of some class of partial differential equations in the distributions space
- Jäger, W. A maximum principle and a uniqueness result for solutions of elliptic equations on Riemannian manifolds
- Jarušek, J. Ranges of certain type of nonlinear operators with applications in partial differential equations
- Jasný, M. Walter's method of lines applied to the equation $\partial w / \partial x = W'(x) + \sqrt{w} \partial^2 w / \partial t^2$
- Kersner, R. On nonlinear degenerate parabolic equations
- Kolomý, J. Structure of Banach spaces and solvability of nonlinear equations
- König, M. Zur Abschätzung der Lösung des Dirichletschen Aussenraumproblems für die Schwingungsgleichung
- Kučera, M. Eigenvalue problem for variational inequalities
- Litewska, K. Rothe methods for parabolic systems
- Lovicar, V. Periodic solutions of second order equations with dissipative terms
- Marcinkowska, H. On a class of mixed problems for linear hyperbolic equations
- Maslennikova, V.N. Asimptotičeskije svojstva rešenij sistem gidrodinamiki vraščajuščejsja židkosti
- Musiał, I. Some problems of behaviour of solutions in Hilbert space
- Muszyński, J. About some integral equation
- Naumann, J. On a class of integro-differential equations
- Netuka, I. Potentials and boundary value problems for the heat equation

- Okrasinski, W. On nonnegative solutions of a nonlinear convolution equation occurring in the theory of water percolation
- Ptašnik, B. "Non-classical" boundary value problems for systems of hyperbolic integro-differential equations
- Sadkowski, W. Behaviour of solutions of some mixed boundary-value problem
- Schappacher, W. Nonlinear functional differential equations and semigroups
- Schoenenberger-Deuel, J. Nonlinear parabolic boundary value problems with upper and lower solutions
- Schulze, B.-W. On elliptic pseudo-differential operators and boundary value problems
- Skrypnik, I.V. Koercitivnyje ocenki dla par linějnykh elliptičeskikh operatorov i ich primeněnija
- Sosulski, W. On convergence of successive approximations of some integral equations
- Souček, J. On the cartesian minimal surfaces
- Stará, J. Remark to regularity properties of weak solutions
- Straškraba, I. On a higher order abstract differential equation
- Szarski, J. Cauchy problem for infinite systems of functional-differential equations
- Szép, A. Singular partial differential equations
- Tabisz, K. On the parabolic quasi-variational inequality with unknown boundaries
- Telschow, G. An iteration procedure for control problems with elliptic equations
- Torelli, A. An evolution free boundary problem
- Vaillancourt, F. Application of a theorem of Brézis-Nirenberg to measure-preserving vectorfield on the two-dimensional torus
- Vesely, J. Some remarks on Dirichlet problem
- Yamaguchi, M. Bounded and almost periodic solutions of quasilinear wave equations
- von Wolfersdorf, L. A modification of the Dirichlet variational problem
- Zacharias, K.:
Gajewski, H. and
Zacharias, K. On Vlasov's equation

Numerical methods and applications

- Abesser, H. Sufficient conditions of optimality and field theory for control problems

- Adler, G. Problems in the digital simulation of thermal secondary oil recovery by combustion
- Agoškov, V. Ispol'zovanie variacionnoj formy tožďestva G.I.Marčuka dla rešenija někotorych differencial'nych uravnenij
- Bock, I. Bending of viscoelastic plates with aging
- Burda, P. Finite elements and diffusion equations
- Čermák, J. Floquet's theory and neutron transport in a periodic slab lattice
- Chocholatý, P.:
Chocholatý, P. and
Šlahor, L. A remark on the solution of a boundary value problem with delay (Presented by L.Šlahor)
- Dávid, A. Orthonormal systems in quasiparabolic differential equations
- Desperat, T. Free boundary problems in the theory of fluid flow through porous media
- Dryja, M. Alternating-direction Galerkin method for Navier-Stokes equation
- Farzan, R. Někotoryje uslovija dla schodimosti i ustojčivosti čislennogo rešenija krajevoj zadači dla parabolického uravnenija so slaboj nělinějnoš'ju
- Feistauer, M. On the study of subsonic rotational flow of an ideal gas
- Galántai, A. On the extensions of some stiff stability concept
- Georg, K. Unstable solutions of second order nonlinear boundary value problems
- Godlewski, E.:
Godlewski, E. and
Raoult, A.P. Multistep methods for $u'' + Bu' + Au = f$ (Presented by E.Godlewski)
- Griepentrog, E. Onestep methods for stiff differential equations
- Gröger, K. Evolution equations in the theory of plasticity
- Haslinger, J. Dual finite element analysis of variational inequalities
- Kafka, J.M. Seventh contribution to the numerical solution of parabolic partial differential equations
- Kodnár, R. Uravnenija uprugo-plastičeskich plastinok pri bol'sich progibach
- Kuzněcov, Ju.:
Kuzněcov, Ju. and
Macokin, A. Metod fiktivnych oblastěj i ego primeněnija (Presented by A.Macokin)
- Lelek, V.: Lelek, V.
and Šafář, J. Numerical solution of diffusion equations on nonuniform net (Presented by J.Šafář)

- Lelek, V.: Lelek, V.
and Wiesner, J. Problem of eigenvalues of nonselfadjoint
Schrödinger operator (Presented by J.Wiesner)
- Lovišek, J. A finite element analysis for the Signorini
problem in plane elastostatics
- Macokin, A.:
Kuzněcov, Ju. and
Macokin, A. Metod fiktivnych oblastěj i ego primeněnija
(Presented by A.Macokin)
- Malina, Ľ. Some remarks on carry over methods
- Milota, J. Minimal interpolation in Banach spaces (Ge-
neral spline functions)
- Moszynski, K. Remarks on spectral approximation
- Nasr, H. Generalized periodic overimplicit multistep
methods for solution of ordinary differential
equations
- Opitz, G. An effective way of generating linear multi-
step expressions for ordinary differential
equations with arbitrary sequences of step-
-size
- Pfeifer, E. On the discrete convergence of approximate
solutions for nonlinear two-point boundary
value problems
- Podhájecký, G. On an algorithm for solving problems of
Schwarz's type
- Práger, M. A remark to the approximate solution of the
Laplace equation in polar coordinates
- Prössdorf, S. O približennom rešenii někotorych integral'-
nych i integro-differencial'nych uravněnij
- Raoult, A.P.:
Godlewski, E. and
Raoult, A.P. Multistep methods for $u'' + Bu' + Au = f$
(Presented by E.Godlewski)
- Rvačev, V.L. Algebrologičeskij metod R-funkcij v krajevych
zadačach dla oblastěj složnoj formy
- Šafář, J.: Lelek, V.
and Šafář, J. Numerical solution of diffusion equations on
nonuniform net (Presented by J.Šafář)
- Sapagovas, M. Numerical solution and application of the
drop shape equation
- vom Scheidt, J. Stochastische Eigenwertprobleme
- Segeth, K. Evaluation of convolution integrals in the
implementation of the finite element method
- Šlahor, Ľ.:
Chochořatý, P. and
Šlahor, Ľ. A remark on the solution of a boundary value
problem with delay (Presented by Ľ.Šlahor)
- Stoyan, G. A monotone difference scheme for diffusion
convection problems allowing for small diffu-
sivity

- Styś, T. The method of lines for degenerate nonlinear parabolic equations
- Szepesvári, I. Error-estimation for certain nonlinear parabolic equations
- Szymańska-Kołodziej, D. Primeněníje někotorigo integral'nogo predstavlenija dla rešenija sistem uravnenij soďeržaščich v sebe uravnenija vtorigo porjadka elliptičeskogo i paraboličeskogo tipov
- Vajteršic, M. Fast algorithm for numerical solution of biharmonic problems on the rectangular region
- Vetluckij, V. Postanovka i rešenije zadači o vjazkom tččeniji v uzkom kanale
- Višňák, K. Some efficient methods for stiff systems
- Wiesner, J.: Lelek, V. and Wiesner, J. Problem of eigenvalues of nonselfadjoint Schrödinger operator (Presented J.Wiesner)
- Ženíšek, A. Curved triangular finite C^m -elements
- Zezula, R. On some nonlinear problems in reactor optimization
