Preface

This book contains most papers presented at the seminar Programs and Algorithms of Numerical Mathematics held in Dolní Maxov, Czech Republic, June 6–11, 2004.

The seminar was organized by the Mathematical Institute of the Academy of Sciences of the Czech Republic and continued the previous seminars on mathematical software held in Alšovice, Bratříkov, Janov n. N., Kořenov, Lázně Libverda, and Dolní Maxov in the period 1983–2002. The objective of this series of seminars is to provide a forum for presentation and discussion of advanced topics, new approaches, and applications of computational methods used on personal computers and workstations.

More than 60 participants from the field took part in the seminar, most of them from the institutes of the Academy of Sciences of the Czech Republic and from Czech universities. We believe that the participation of a lot of young scientists, PhD students, and also some undergraduate students is a positive feature of the seminar. The Organizing Committee included Jan Chleboun, Petr Příkryl, Karel Segeth, and Tomáš Vejchodský. Mrs Hana Bílková kindly helped in preparing manuscripts for print.

All papers have been reproduced directly from material submitted by the authors but an attempt has been made to use a unified layout for each paper.

The editors and organizers wish to thank all distinguished scientists who supported our efforts by reviewing the papers submitted.

J. Chleboun, P. Příkryl, K. Segeth
