## Contents

Preface .....	7
<i>Luděk Beneš, Karel Kozel, Ivo Sládek</i> Numerical modeling of flow and pollution dispersion over real topography .....	9
<i>Michal Beneš, Petr Mayer</i> Numerical analysis of mathematical model of heat and moisture transport in concrete at high temperatures .....	16
<i>Radim Blaheta</i> Hierarchical FEM: strengthened CBS inequalities, error estimates and iterative solvers .....	24
<i>Pavel Burda, Jaroslav Novotný, Jakub Šístek</i> Accuracy investigation of a stabilized FEM for solving flows of incompressible fluid .....	30
<i>Lubor Buřič, Vladimír Janovský</i> On a traffic problem .....	37
<i>Claudio Canuto, Tomáš Kozubek</i> A fictitious domain approach to the numerical solution of elliptic boundary value problems defined in stochastic domains .....	46
<i>Jan Chleboun</i> On a Sandia structural mechanics challenge problem .....	53
<i>Jiří Dobeš, Herman Deconinck</i> A second order unconditionally positive space-time residual distribution method for solving compressible flows on moving meshes .....	60
<i>Jiří Dobiáš, Svatopluk Pták, Zdeněk Dostál, Vít Vondrák</i> Scalable algorithms for contact problems with geometrical and material non-linearities .....	67
<i>Vít Dolejší</i> An efficient implementation of the semi-implicit discontinuous Galerkin method for compressible flow simulation .....	74
<i>Lenka Dubcová, Miloslav Feistauer, Petr Sváček</i> Numerical simulation of interaction of fluids and solid bodies .....	80
<i>Jiří Fürst</i> Finite volume WLSQR scheme and its applications to transonic flows .....	86

<i>Antti Hannukainen, Sergey Korotov</i>	
Two-sided a posteriori estimates of global and local errors for linear elliptic type boundary value problems .....	92
<i>Milan Hokr</i>	
Benchmark calculations of the variable-density flow in porous media .....	104
<i>Dáša Janovská, Vladimír Janovský</i>	
Remark on computing the analytic SVD .....	111
<i>Volker John, Petr Knobloch</i>	
A computational comparison of methods diminishing spurious oscillations in finite element solutions of convection–diffusion equations .....	122
<i>R. Keslerová, K. Kozel, V. Prokop</i>	
Numerical solution of Newtonian flow in bypass and non-Newtonian flow in branching channels .....	137
<i>Martin Kocurek</i>	
The use of basic iterative methods for bounding a solution of a system of linear equations with an M-matrix and positive right-hand side .....	143
<i>Aleš Kropáč, Michal Křížek</i>	
On the longest-edge bisection algorithm .....	149
<i>Michal Křížek, Alena Šolcová, Lawrence Somer</i>	
Šindel sequences and the Prague horologe .....	156
<i>Radek Kučera, Tomáš Kozubek, Jaroslav Haslinger</i>	
On solving non-symmetric saddle-point systems arising from fictitious domain approaches .....	165
<i>Václav Kučera</i>	
The discontinuous Galerkin method for low-Mach flows .....	172
<i>Milan Kuchařík, Richard Liska, Pavel Váchal, Mikhail Shashkov</i>	
Arbitrary Lagrangian-Eulerian (ALE) methods in compressible fluid dynamics	178
<i>Pavel Kůs, Vít Dolejší</i>	
Solution of time-dependent convection-diffusion equations with the aid of higher order adaptive methods with respect to space and time .....	184
<i>Ladislav Lukšan, Ctirad Matonoha, Jan Vlček</i>	
Interior-point method for large-scale $l_1$ optimization .....	190
<i>Jaroslav Mlýnek</i>	
The application of the thermal balance method for computation of warming in electric machines .....	196

<i>Vratislava Mořová</i>	
Why are the meshless methods used? .....	202
<i>Jan Pospíšil</i>	
Numerical approaches to parameter estimates in stochastic differential equations driven by fractional Brownian motion .....	208
<i>Aleř Prachař, Karel Najzar</i>	
Numerical integration in the discontinuous Galerkin method for elliptic problems .....	214
<i>Petra Punčochářová, Karel Kozel, Jiří Fürst, Jaromír Horáček</i>	
An unsteady numerical solution of viscous compressible flows in a channel .....	220
<i>Karel Segeth, Pavel Šolín</i>	
On some a posteriori error estimation results for the method of lines .....	229
<i>Petr Sváček</i>	
On a finite element method application in aeroelasticity .....	235
<i>J. Vala, S. Šťastník, H. Kmínová</i>	
Uncertainties in measurement of thermal technical characteristics of building insulations .....	240
<i>Tomáš Vejchodský, Pavel Šolín</i>	
Discrete Green's function and maximum principle .....	247
List of Participants .....	253
